

APS Innovations Townhall on APS Language September 8, 2022

Discussion Questions

Thank you for registering to participate in the APS Innovations Townhall on APS Language! We are sending the discussion questions to registrants prior to the webinar as an opportunity to prepare for the discussion.

If you are not able to attend the Townhall in-person, please consider submitting your comments to the APS TARC at apstarc-ta@acl.hhs.gov. And watch the recording which will be made available broadly on the TARC website.

Please note: these activities are entirely optional. We aim to provide multiple ways for APS professionals and collaborators to provide feedback.

1. As the field of APS and language, in general, evolves are there terms currently used in your program or the larger field that you view as problematic or outdated? Please provide examples.
2. Are there alternative terms that you would like to see used in your program or the larger APS field? Please provide examples.
3. Have you received feedback from clients on APS language?
4. What do you believe are the largest barriers to language change in your program or the larger APS field? What are potential solutions to those barriers?
5. Is your program currently engaged in reviewing APS language use? Please share any plans and/or outcomes.
